Parameter	Value	Notes
Processing mode	Kinematic (post-processing)	Standard point positioning
Sampling interval	30 s	IGS standard
Frequency	Single-frequency (L1, 1575.42 MHz)	Commercial-grade setup
Elevation mask angle	15°	Excludes low-elevation satellites
Ephemeris source	Broadcast ephemeris	Standard GNSS model
Ionosphere model	Off / Klobuchar baseline	Raw L1 pseudoranges retained to preserve ionospheric signature
Troposphere model	Saastamoinen	Standard tropospheric delay model
Multipath mitigation	Choke-ring antenna at IGS site	Isolates ionospheric error dynamics
Output	Easting, Northing errors (horizontal)	Geodesic distance in metres
Reference position	Known IGS station coordinates	Ground-truth baseline
